

Onatola Timilehin Faruq

Full-Stack Engineer | Web2 + Web3 | Builder

onatolafaruq@gmail.com | github.com/Leihyn | faruukku.vercel.app | linkedin.com/in/leihyn

What I Do

I build things end-to-end. Smart contracts to backend APIs to polished frontends. I've shipped production platforms solo, won hackathons, and I use Claude Code daily as my primary development tool.

Tech Stack

Frontend: React, Next.js 14, TypeScript, Tailwind, Three.js, React Three Fiber

Backend: Node.js, Express, PostgreSQL, Redis, WebSocket, GraphQL, REST APIs

Web3: Solidity, Rust, Foundry, Ethers.js, Viem, Wagmi, The Graph, IPFS

Infrastructure: Docker, GitHub Actions, Vercel, Tenderly

AI Tooling: Claude Code (daily driver), prompt engineering, AI-assisted development workflows

Selected Projects

Privacy Chronicles — Content Creation Track Winner, Zypherpunk Hackathon. 5-episode comic series (70+ pages) explaining zero-knowledge proofs through narrative. Built immersive 3D solar system in React Three Fiber where each planet is an episode. Voice narration, accessibility-first design. `Next.js` `Three.js` `React Three Fiber` `TypeScript`

TruthBounty — 2nd Place, Seedify Hackathon. Reputation protocol tracking prediction accuracy across 13 markets. Soulbound NFTs with on-chain SVG, custom subgraphs, Wilson Score algorithm. `Solidity` `The Graph` `Next.js`

Nocturne — Private Payments on Solana. ZK-powered privacy protocol. Stealth addresses, Merkle commitment pools, Noir circuits, TEE relay. 97% unlinkability score. `Rust` `Anchor` `Noir` `Zero-Knowledge`

Comic Pad — Production NFT Platform (Solo Build). Full-stack marketplace on Hedera from scratch. 50K+ transactions, 10K+ daily API requests, real-time WebSocket updates, hybrid IPFS/Arweave storage, multiple auction types, token-gated content. `Solidity` `Next.js` `PostgreSQL` `Redis` `WebSocket`

Sentiment — Uniswap v4 Dynamic Fee Hook (UHI7 Capstone). Counter-cyclical fees (0.25%-0.44%) driven by real-time market sentiment from 8 data sources. Multi-keeper architecture, <30k gas overhead per swap. Graduated from Uniswap Hook Incubator (15% acceptance rate). `Solidity` `Foundry` `Chainlink` `Uniswap v4`

OmniSwap SDK — Cross-Chain Atomic Swaps. SDK enabling swaps across 6 blockchains. HTLC protocol, chain-specific adapters, automated refund management, 70KB+ documentation. `TypeScript` `Solidity`

Experience

Blockchain Engineer | DeFiConnectCredit | Jan 2025 - Present

- Integrating Aave v3, Uniswap v3/v4, Curve, GMX in production
- Cut deployment time from 2 hours to 15 minutes with automation
- 95%+ test coverage, 35% gas cost reduction through optimization

Blockchain Engineer (Intern) | DeFiConnectCredit | Jun 2024 - Dec 2024

- Security reviews on 15+ contracts pre-deployment
- Built ERC721 incentive system with Merkle proofs for 500+ users

Why Me

- Web2 + Web3:** I don't just write smart contracts. I build the APIs, the frontends, the infra. Privacy Chronicles combined 3D graphics with ZK education. Nocturne is a full privacy protocol on Solana.
- Claude Code:** It's my daily development environment. I use it for everything from architecture to debugging to shipping.
- I ship fast:** 6 hackathon projects in the last year. Multiple production deployments. I turn ideas into working products.

Recognition

- Content Creation Track Winner — Zypherpunk Hackathon (Zcash & Mina Foundations)
- 2nd Place — Seedify Prediction Market Hackathon
- Uniswap Hook Incubator (UHI7) Graduate — 15% acceptance rate
- Cyfrin Updraft — DeFi Security & Protocol Engineering (Completed)
- School of Solana — Ackee Blockchain (Ongoing)

Education

BSc Physiotherapy | University of Ibadan | 2024
