

Onatola Timilehin Faruq

DeFi Analyst | Blockchain Educator | Technical Content Creator

onatolafaruq@gmail.com | github.com/Leihyn | faruukku.vercel.app | youtube.com/@leihyn

Executive Summary

DeFi engineer turned educator with hands-on experience building production integrations with Aave v3, Uniswap v3/v4, Curve, GMX, and Chainlink. UHI7 graduate (Uniswap Hook Incubator, 15% acceptance rate) with direct Uniswap Labs collaboration. Mina Foundation Content Creation Track Winner for translating complex Web3 concepts into accessible developer content. Creates comprehensive documentation, tutorials, and educational materials that help others understand DeFi from the inside out.

Core Competencies: DeFi Protocol Expertise • Technical Content Creation • Educational Documentation • Complex Concept Simplification • Community Engagement • Research & Analysis

DeFi Protocol Expertise

Lending & Borrowing: Aave v3 (supply/borrow mechanics, collateral management, liquidation engines, interest rate models, flash loans)

DEXs & AMMs: Uniswap v3/v4 (concentrated liquidity, hooks, fee tiers, LP strategies), Curve (StableSwap invariant, CryptoSwap, veTokenomics)

Perpetuals & Derivatives: GMX (perpetual trading, GLP mechanics, funding rates)

Oracles & Infrastructure: Chainlink (price feeds, VRF, Automation, CCIP)

Cross-Chain: HTLC atomic swaps, bridge protocols, multi-chain architecture

Privacy & ZK: zkSNARKs, zkSTARKs, stealth addresses, privacy pools

Content Creation & Education

Video Content – YouTube Channel (youtube.com/@leihyn) Created product demo videos walking through DeFi projects, explaining features, architecture, and user flows. Experience recording, editing, and presenting technical content in accessible formats.

Mina Foundation Content Creation Track Winner – Zyperpunk Hackathon Created technical content translating complex Web3 concepts for developer audiences. Recognized for clarity and accessibility of explanations.

Technical Documentation – OmniSwap SDK Authored 70KB+ documentation including:

- Architecture overviews explaining cross-chain swap mechanics
- Step-by-step integration tutorials for developers at different skill levels
- API references with practical examples
- 5 working code examples with explanations

Open Source Education All 11 public repositories include comprehensive README files, tutorials, and contributing guides designed to help developers understand and build upon the code.

Professional Experience

Blockchain Engineer | DeFiConnectCredit | Remote | Jan 2025 – Present

- Built production integrations with Aave v3, Uniswap v3, GMX, and Curve, gaining deep understanding of protocol mechanics
- Created technical documentation explaining architecture decisions, trade-offs, and implementation details
- Conducted security reviews on 15+ contracts, documenting vulnerabilities and remediation steps in accessible language
- Mentored junior developers on DeFi concepts and smart contract best practices

Blockchain Development Engineer (Intern) | DeFiConnectCredit | Remote | Jun 2024 – Dec 2024

- Implemented lending protocol features including collateral management and liquidation mechanics
 - Developed comprehensive test suites with documentation explaining edge cases and failure scenarios
 - Produced internal documentation helping team members understand protocol integrations
-

Featured Projects

Sentiment – Uniswap v4 Dynamic Fee Hook

UHI7 Incubator Capstone | github.com/Leihyn/Sentiment

Dynamic fee hook implementing counter-cyclical fees based on market sentiment.

- Graduated from UHI7 (15% acceptance rate) with Uniswap Labs collaboration
- Built fee adjustment algorithm (0.25%-0.44%) responding to market conditions
- Gained deep understanding of Uniswap v4 architecture and hook mechanics
- Can explain AMM fee structures, concentrated liquidity, and hook design patterns

OmniSwap SDK

Cross-Chain Swap SDK | github.com/Leihyn/omniswap-sdk

Production SDK enabling atomic swaps across 6 blockchains.

- Created 70KB+ documentation with tutorials and examples
- Built chain adapters for Zcash, Osmosis, Mina, Aztec, Miden, Fhenix
- Can explain HTLC mechanics, atomic swaps, and cross-chain architecture

TruthBounty – Reputation Protocol

2nd Place, Seedify Hackathon | github.com/Leihyn/TruthBounty

Decentralized reputation system for prediction markets on BNB Chain.

- Built accuracy tracking across PancakeSwap & Polymarket predictions
- Implemented soulbound NFT credentials for on-chain reputation
- Can explain prediction market mechanics and reputation systems

Comic Pad – NFT Marketplace

Hedera Hashgraph | github.com/Leihyn/comicPad

Full-stack NFT platform serving 1K+ concurrent users.

- Solo-built from smart contracts to frontend
- Designed 3 tokenization models: full-issue, paginated, collection series
- Can explain NFT standards, marketplace mechanics, and tokenization strategies

USDCx-Lending

Stacks Blockchain | github.com/Leihyn/USDCx-Lending

Lending protocol with collateralized borrowing.

- Built interest rate models and liquidation mechanics in Clarity
- Can explain lending protocol design, collateralization, and liquidation triggers

Additional Projects

Project	Description
OmniShield Wallet	Multi-chain HD wallet with BIP-39/32/44 key derivation
Nocturne	Private payments using ZK proofs and stealth addresses
BankOfCronos	AI-powered DeFi with automated hedging strategies
Cybria Bridge	Cross-chain bridge with 3-of-5 multi-sig security
CelestiFi	Whale activity tracking with sub-second alerts

Technical Skills

Smart Contracts: Solidity (Advanced) • Rust/Anchor (Intermediate) • Clarity • Noir

Blockchain Networks: Ethereum • Arbitrum • Base • Solana • Hedera • BNB Chain • Cosmos • Stacks

Development: TypeScript • React • Next.js • Node.js • ethers.js • Foundry • Hardhat

Analysis Tools: Tenderly • Dune Analytics • On-chain data analysis

Achievements & Certifications

Mina Foundation Content Creation Track Winner – Zypherpunk Hackathon *Technical content translating complex Web3 concepts for developer audiences*

2nd Place – Seedify Prediction Market Hackathon *TruthBounty: Decentralized reputation protocol*

Uniswap Hook Incubator (UHI7) – Graduate 15% acceptance rate • Direct Uniswap Labs collaboration

Cyfrin Updraft – DeFi Security & Protocol Engineering *Aave v3 • Uniswap v3/v4 • GMX • Curve v1/v2 • Smart Contract Security*

Hashgraph Developer Certification – The Hashgraph Association

Education

Languages

Human: English (Native) • Spanish (Conversational)

Programming: Solidity • TypeScript • Rust • Clarity • Noir
